DIE FRAUNHOFER-GESELLSCHAFT THE FRAUNHOFER-GESELLSCHAFT

Die Fraunhofer-Gesellschaft ist die führende Organisation für angewandte Forschung in Europa. Unter ihrem Dach arbeiten 72 Institute und Forschungseinrichtungen an Standorten in ganz Deutschland. Mehr als 25 000 Mitarbeiterinnen und Mitarbeiter erzielen das jährliche Forschungsvolumen von 2,3 Milliarden Euro. Davon fallen knapp 2 Milliarden Euro auf den Leistungsbereich Vertragsforschung. Rund 70 Prozent dieses Leistungsbereichs erwirtschaftet die Fraunhofer-Gesellschaft mit Aufträgen aus der Industrie und mit öffentlich finanzierten Forschungsprojekten. Internationale Kooperationen mit exzellenten Forschungspartnern und innovativen Unternehmen weltweit sorgen für einen direkten Zugang zu den wichtigsten gegenwärtigen und zukünftigen Wissenschafts- und Wirtschaftsräumen.

Unsere Vertragspartner und Auftraggeber sind:

- Industrieunternehmen
- Dienstleistungsunternehmen
- Öffentliche Hand

Die wichtigsten Kennzahlen auf einen Blick

- 72 Institute und Forschungseinrichtungen
- Rund 25 000 Mitarbeiterinnen und Mitarbeiter
- 2,3 Milliarden Euro Forschungsvolumen jährlich
- Über 70 Prozent werden mit Aufträgen aus der Industrie und mit öffentlich finanzierten Forschungsprojekten erwirtschaftet
- Internationale Zusammenarbeit durch weltweite Niederlassungen

www.fraunhofer.de

The Fraunhofer-Gesellschaft is the leading organization for applied research in Europe. Its research activities are conducted by 72 institutes and research units at locations throughout Germany. The Fraunhofer-Gesellschaft employs a staff of more than 25,000, who work with an annual research budget totaling 2.3 billion euros. Of this sum, almost 2 billion euros is generated through contract research. Around 70 percent of the Fraunhofer-Gesellschaft's contract research revenue is derived from contracts with industry and from publicly financed research projects. International collaborations with excellent research partners and innovative companies around the world ensure direct access to regions of the greatest importance to present and future scientific progress and economic development.

Customers and contractual partners are:

- Industry
- Service sector
- Public administration

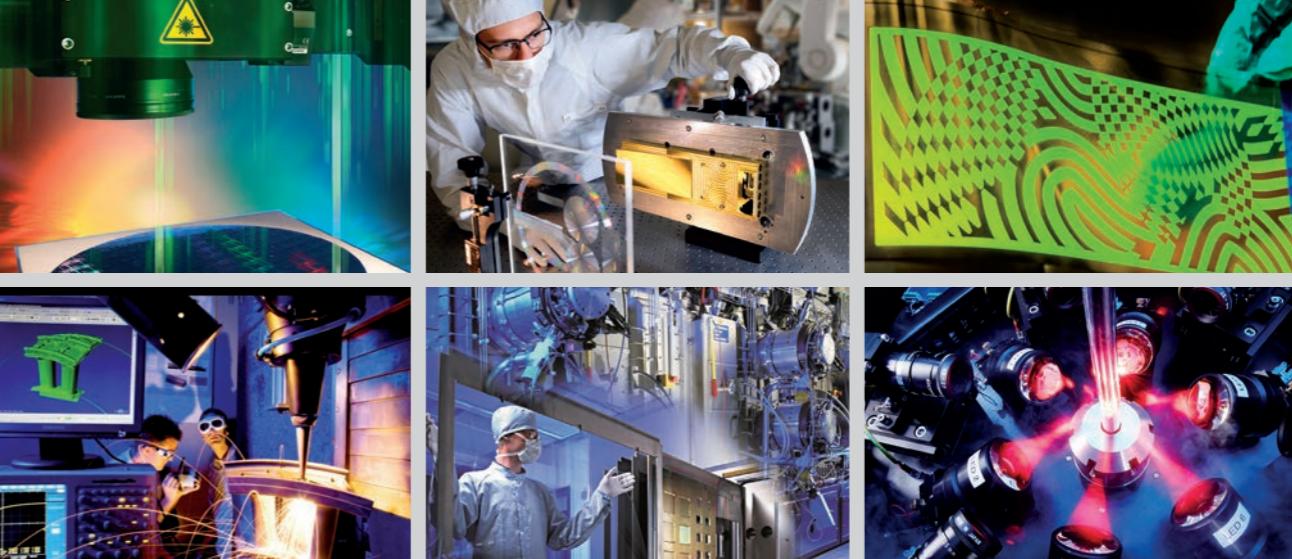

Key figures at a glance

- 72 institutes and research units
- 25,000 staff
- 2.3 billion euros annual research budget totaling
- More than 70 percent of the Fraunhofer-Gesellschaft's contract research revenue is derived from contracts with industry and from publicly financed research projects
- International cooperation through affiliated research centers and worldwide representative offices

FRAUNHOFER VERBUND LIGHT & SURFACES

FRAUNHOFER GROUP FOR LIGHT & SURFACES

Competence by Networking

Six Fraunhofer institutes cooperate in the Fraunhofer Group Light & Surfaces. Co-ordinated competences allow quick and flexible alignment of research work in the field of optics, laser and thin film technology as well as material on the requirements of different fields of application. Coordinated activities are carried out to answer actual and future challenges, especially in the fields of energy, environment, production, information and security.

Core Competences of the Group

- Surface and coating functionalization
- Laser-based manufacturing processes
- Laser development and nonlinear optics
- Materials in optics and photonics
- Microassembly and system integration
- Micro and nano technology
- Carbon technology
- Measurement methods and characterization
- Ultra precision engineering
- Material technology
- Plasma and electron beam sources

Business Areas

- Ablation and cutting
- Imaging and illumination
- Additive manufacturing
- Light sources and laser systems
- Lithography
- Material testing and analytics
- Medical engineering and biophotonics
- Micro systems and sensors
- Opticals systems and instrumentation
- Tooling and mold making

Fraunhofer Institute for Organic Electronics, Electron Beam and Plasma Technology FEP

The Fraunhofer FEP works on innovative solutions in the fields of vacuum coating, surface treatment as well as organic semiconductors. The core competences electron beam technology, sputtering, plasma-activated deposition and high-rate PECVD as well as technologies for organic electronics and IC/system design provide a basis for these activities. Fraunhofer FEP continuously enhances them and makes them available to a wide range of industries: mechanical engineering, transport, biomedical engineering, architecture and preservation, packaging, environment and energy, optics, sensor technology and electronics as well as agriculture.

www.fep.fraunhofer.de

Fraunhofer Institute for Laser Technology ILT

With more than 400 employees the Fraunhofer ILT develops innovative laser beam sources, laser technologies, and laser systems for its partners from the industry. Our technology areas cover the following topics: laser and optics, medical technology and biophotonics, laser measurement technology and laser material processing. This includes laser cutting, caving, drilling, welding and soldering as well as surface treatment, micro processing and additive manufacturing. Furthermore, the Fraunhofer ILT is engaged in laser plant technology, process control, modeling as well as in the entire system technology.

www.ilt.fraunhofer.de

Fraunhofer Institute for Applied Optics and Precision Engineering IOF

The Fraunhofer IOF develops innovative optical systems to control light from the generation to the application. Our service range covers the entire photonic process chain from optomechanical and opto-electrical system design to the manufacturing of customized solutions and prototypes. The institute works in the five business fields of Optical Components and Systems, Precision Engineering Components and Systems, Functional Surfaces and Layers, Photonic Sensors and Measuring Systems and Laser Technology.

www.iof.fraunhofer.de

Fraunhofer Institute for Physical Measurement Techniques IPM

The Fraunhofer IPM develops tailor-made measuring techniques, systems and materials for industry. In this way we enable our customers to minimize their use of energy and resources while at the same time maximizing quality and reliability. Fraunhofer IPM makes processes more ecological and at the same time more economical. Many years of experience with optical technologies and functional materials form the basis for high-tech solutions in the fields of production control, materials characterization and testing, object and shape detection, gas and process technology as well as functional materials and systems.

Fraunhofer Institute for Surface Engineering and Thin Films IST

As an innovative R&D partner the Fraunhofer IST offers complete solutions in surface engineering which are developed in cooperation with customers from industry and research. The IST's »product« is the surface, optimized by modification, patterning, and/or coating for applications in the business units mechanical engineering, tools and automotive technology, aerospace, energy and electronics, optics, and also life science and ecology. The extensive experience of the Fraunhofer IST with thin film deposition and film applications is complemented by excellent capabilities in surface analysis and in simulating vacuum-based processes.

www.ist.fraunhofer.de

Fraunhofer Institute for Material and Beam Technology IWS

The Fraunhofer IWS is known for its innovations in the business units joining and cutting as well as in the surface and coating technology. Across all business units our interdisciplinary topics include energy storage systems, energy efficiency, additive manufacturing, lightweight construction and big data. Our special feature is the expertise of our scientists in combining the profound know-how in materials engineering with the extensive experience in developing system technologies. Every year, numerous solutions with regard to laser material processing and coating technology have been developed and have found their way into industrial applications.

RÜCKBLICK HIGHLIGHTS

SID-ME Chapter Spring Meeting 2017

13.03.–14.03.2017, Dresden

This year's SID Mid-Europe (SID-ME) Spring Meeting with focus on „Wearables and Projection Displays“ was organized by Fraunhofer FEP, Dresden, Germany.

The announced talks and presentations of 20 internationally renowned speakers, thereof 3 keynote speakers from Microsoft Corp., Technical University of Dresden and University of Cambridge as well as 5 invited speakers were attracting more than 100 participants from 18 countries worldwide. Additionally to this, more than 10 poster contributions attracted the interest of many participants. The successful first conference day with many interesting talks ended with a reception and evening event at Dresden city centre. Both days were accompanied by poster sessions with 13 poster contributions as well as an industrial exhibition with 6 booths and many possibilities for networking and interesting conversations.

Many thanks to our sponsors and all participants and contributions!

VISION | FLEXIBLE GLASS

04.04.–05.04.2017, Dresden

VISION | FLEXIBLE GLASS is an international technology and networking event that focuses on research and development for ultra-thin flexible glass in both sheet-to-sheet and roll-to-roll processes at Fraunhofer FEP.

Fraunhofer FEP began its activities in the field of flexible glass in 2013, and has since then increasingly established important collaborations with the world leading manufacturers for flexible glass.

Together with VON ARDENNE GmbH, we presented the world's first roll-to-roll coater for ultra-thin glass – the FOSA LabX 330, which was installed in October 2016 at Fraunhofer FEP in Dresden.

With more than 130 participants, VISION | FLEXIBLE GLASS was a huge success. We would like to especially thank the sponsors VON ARDENNE GmbH and SCHOTT AG.

pro flex 2017

27.11.–28.11.2017, Dresden

The scope of the workshop pro flex 2017 was to bring together equipment suppliers, film manufacturers, users of roll-to-roll equipment, converters, end-users of flexible materials as well as R&D institutions.

The talks covered nearly every aspect of roll-to-roll technology and highlighted very interesting and even visionary applications of flexible materials: architecture and OLED lighting. The talks were complemented by many possibilities for discussions as well as a lab tour on the second day.

The workshop pro flex has first been successfully held in 2004 and took place in Dresden, Germany, for the fifth time and with more than 100 participants from 15 countries (Europe, Asia, and America).

“Pro flex 2017 conference was one of the best I have attended with a broad mix of interesting papers. Dr. Nicolas Schiller and his team at Fraunhofer FEP are to be congratulated on putting together an excellent program that was well received by the 100-plus participants.”

Dr. Charles A. Bishop in Converting Quarterly 2018, Q1
