O-BUTTON
WEARABLE MODULAR DEVICE
**O-BUTTON** is a fascinating little thing born out of love to wearable light!

Light conveys a message, inspires, enlightens and lifts up your spirits.

**O-BUTTON** is based on OLED technology – organic light emitting diodes. OLED is an area-light source and comes in a variety of possible emission colours. What colour is your mood today?

It is possible to create OLEDs of various sizes and designs.

Create your own systems for sensing and interacting with the world around you with the modular **O-BUTTON** system.
